

PRESS RELEASE

Winter Construction Begins Update of Humphries Elementary School in Atlanta

(August 19, 2019) ATLANTA, GA – Winter Construction has begun the renovation of Joseph Humphries Elementary School, a school in the South Atlanta cluster of Atlanta Public Schools. Winter will build a new addition for the school and upgrade the existing building’s roof, electrical, and plumbing systems, as well as making many other improvements.

Winter’s renovation and addition will provide 62,497 square feet of updated educational space. The new addition is 10,400 square feet, and it will feature a STEM lab as well as six new classrooms and new administrative offices. Winter will also update the storm and sanitary drainage on the school grounds, which will include installing an underground stormwater detention basin.

Carrie Campbell, Director of Operations for Winter, said, “We’re honored to be selected for this renovation and addition. The job is special to us because in past years we built an addition at Humphries Elementary, and we have completed projects at the high school and the middle school in Atlanta Public Schools’ South Atlanta cluster.”

Winter Construction is an expert in school construction and renovation. In the past five years, Winter has built and renovated 1.4 million square feet of K-12 educational space. Winter has completed 13 projects in the past 15 years for Atlanta Public Schools. Including fast-track summer renovations, Winter will be carrying out projects in nine different schools around metropolitan Atlanta in the current year.

The renovation and addition at Joseph Humphries Elementary School is planned for completion in the summer of 2020. CDH Partners is the architect for the project.

About Winter Construction:

Winter Construction is a privately owned and operated Atlanta based general contracting company. We provide construction services to clients in the hospitality, retail, government, education, senior living, and multi-family markets throughout the Southeast.
